About me

Graduate Engineer in Information Technology with a completed professional degree from the School of Computing, Belgrade Serbia. During my studies, I gained knowledge in software development, databases, web technologies, information systems, and computer networks, which I applied through practical projects. I am characterized by a responsible attitude, an analytical approach to problem-solving, and a strong commitment to continuous learning and professional development. I am communicative, work well in team environments, and adapt easily to new technologies and work-related challenges. I have a good command of English, both written and spoken, which enables me to effectively work with technical documentation and communicate in an international professional environment. I am currently seeking my first professional position where I can apply my knowledge, contribute to a team, and further develop my skills and expertise.

Veštine i tehničko znanje

1. Web development

- Back-end: PHP (Laravel), ASP.NET, Python (Flask) – development of REST APIs, server-side logic, and basic authentication mechanisms.
- Front-end: TypeScript, React, Vue.js – development of user interfaces using component-based approaches and fundamentals of single-page applications. Bootstrap, Tailwind CSS.

2. System administration & scripting

- Maintenance and administration of Unix/Linux systems.
- Bash scripting for automation and basic administrative tasks.

3. Programming

- Languages: Python, C, C# – focus on object-oriented programming, writing clean and modular code through practical projects and assignments.

4. Databases & SQL

- Advanced knowledge of SQL (MySQL, Microsoft SQL Server / T-SQL).
- Database design and modeling: conceptual and relational models, normalization.

- Practical experience in database creation, writing complex queries, working with indexes, triggers, and stored procedures.

5. *Networking*

- Understanding of the OSI model and Internet protocols, as well as experience developing simple client/server applications in Python.
- Subnetting
- Practical experience with Cisco Packet Tracer; familiar with Cisco routers, switches, and fundamental networking concepts through laboratory exercises, including routing, switching, VLANs, and basic troubleshooting.

6. *Soft / transferable skills*

- Communication: Clear communication of ideas and effective teamwork.
- Problem-solving: Analytical approach and persistence in finding practical solutions.
- Adaptability: Quick to acquire new knowledge and adapt to new technologies and tools.
- Attention to detail: Careful and precise approach to writing queries, database design, and code debugging.
